

**STRONG.
RELIABLE.
CERTIFIED.**

WELCOME TO AURA STEEL

As an Australian-owned and operated steel distributor, we pride ourselves on offering a diverse range of high-quality steel products to customers across the country. Being a subsidiary of Finn Pacific Group (FPG) allows us to access a vast network of steel manufacturers worldwide, enabling us to deliver reliable and economical steel solutions.

Capitalising on our extensive networks, we source a wide array of steel products from around the globe. This enables us to provide our customers with competitive pricing and quick turnaround times. We manage every aspect of the supply chain, from sourcing and procurement to logistics and freight, guaranteeing a seamless delivery process.

At Aura Steel, our commitment to excellence means that we source high quality, certified steel. We have achieved the highest possible accreditation for Australian steel distributors, instilling confidence in our customers that their materials meet all necessary requirements.

With Aura Steel as your trusted partner, you can expect nothing but the best for all your steel needs.

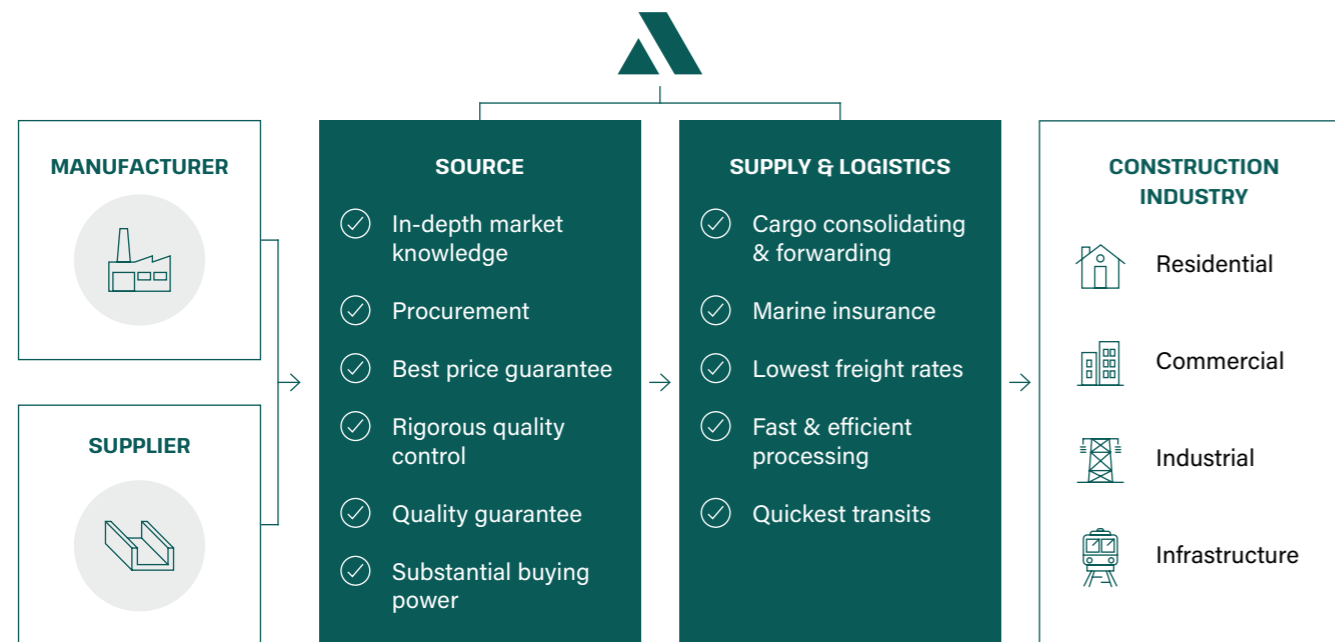

END-TO-END SUPPLY CHAIN EXCELLENCE

Aura Steel offers a fully integrated supply-chain solution, from manufacture to delivery and consolidation of all cargo at port, as well as packing, customs clearance, forwarding, and shipment to the customer's destination port.

This integrated solution gives us substantial buying power – a benefit we pass on to our customers – and we're able to finance the full supply chain with attractive terms.

Using tried-and-tested manufacturers from around the world, we're able to guarantee the quality of all steel products. As well as having rigorous quality-control measures in place, we take out marine transit insurance as standard – giving customers priceless peace of mind that any damage or accidental loss in transit is totally covered.

COMMITTED TO QUALITY

Aura Steel takes pride in being certified by the **Australasian Certification Authority for Reinforcing and Structural Steels (ACRS)**, the leading and most technically rigorous steel certifier aligned with Australian and New Zealand standards. ACRS operates independently of steel suppliers, ensuring unbiased assessments. Our ACRS accreditation provides our customers with confidence, assuring them that our steel products meet all durability and safety requirements. With this certification, we guarantee that the sourcing of materials and the delivery of finished steel to your site adhere to the highest standards.

To further demonstrate our commitment to quality and set ourselves apart from the competition, Aura Steel has obtained registration with the **Queensland Department of Transport and Main Roads** as a distributor of steel for bridges and other structures. This represents the highest level of accreditation available for steel distributors in Queensland.

EMPOWERED BY FINN PACIFIC GROUP

Established in 2016, the **Finn Pacific Group (FPG)** is a multifaceted organisation that manages a diverse portfolio of businesses, providing products, services, and projects for government and private enterprises across Australia and the Asia Pacific.

Today, FPG serves as the parent company to a family of businesses that share a core commitment to family values, honesty, and reliability. This portfolio includes Pacific Islands International, Power Protection Industries, PPI PM, Aura Steel, Finn Property Group, and Luxury Exports.

Pacific Islands International (PII), established in 1998, is a comprehensive source and supply company offering a wide array of quality building materials for residential, commercial, and industrial construction projects in the Pacific Islands.

With divisions spanning hardware distribution, architecture, projects and procurement, F&B and FMCG, PII delivers fully integrated supply-chain solutions and credits its extensive connections and family values to ensure competitive pricing, exemplary quality control, and secure deliveries.

Power Protection Industries (PPI) is a specialised electrical solutions provider known for delivering high-quality materials at competitive prices across various industries, offering customised services, including project management, training, and certification, to customers in Australia and the Asia Pacific.

Power Protection Industries Project Management (PPI PM) leverages 20 years of experience to guide building services projects from design to installation, providing end-to-end advice on power protection projects while tailoring solutions to specific environments and economic boundaries.

Leveraging global connections, **Aura Steel** supplies Australian customers with high-quality, certified steel products, ensuring timely delivery and exceptional economic value, every time.

Luxury Exports, the export division of Luxury Paints, offers comprehensive coating solutions to the international market, specialising in products that withstand harsh tropical conditions. The team ensures customer satisfaction by providing dedicated service, ongoing product training, and marketing support.

AURA STEEL PRODUCT RANGE
